Introduction to SEO (Search Engine Optimization)

Let us learn

- Definition of SEO
- Types of SEO
- Techniques of SEO
- SEO-Page content
- SEO- Keywords
- SEO-Social Book marking
- SEO-SMO

2.1 Introduction

SEO stands for Search Engine Optimization. SEO is a technique used for: designing and developing a website to rank high in search engine results. It is a subset of search engine marketing. Thus SEO is useful in increasing the number of visitors to a website.

There are many strategies and techniques adopted to optimize the

webpage. This chapter introduces few ways at the beginners level.

Do you know?

Search Engine is an online program or software that helps users to search for information on world wide web. Examples of Search Engine include Google, Yahoo and Bing

2.2 Types of SEO - There are two types of optimization

- **On-Page SEO** : It includes Provision of good content, good keywords selection, putting keywords on correct places, giving appropriate title to every page etc.
- **Off-Page SEO** : It includes link building, increasing link popularity by submitting open directories, search engines, link exchange etc.

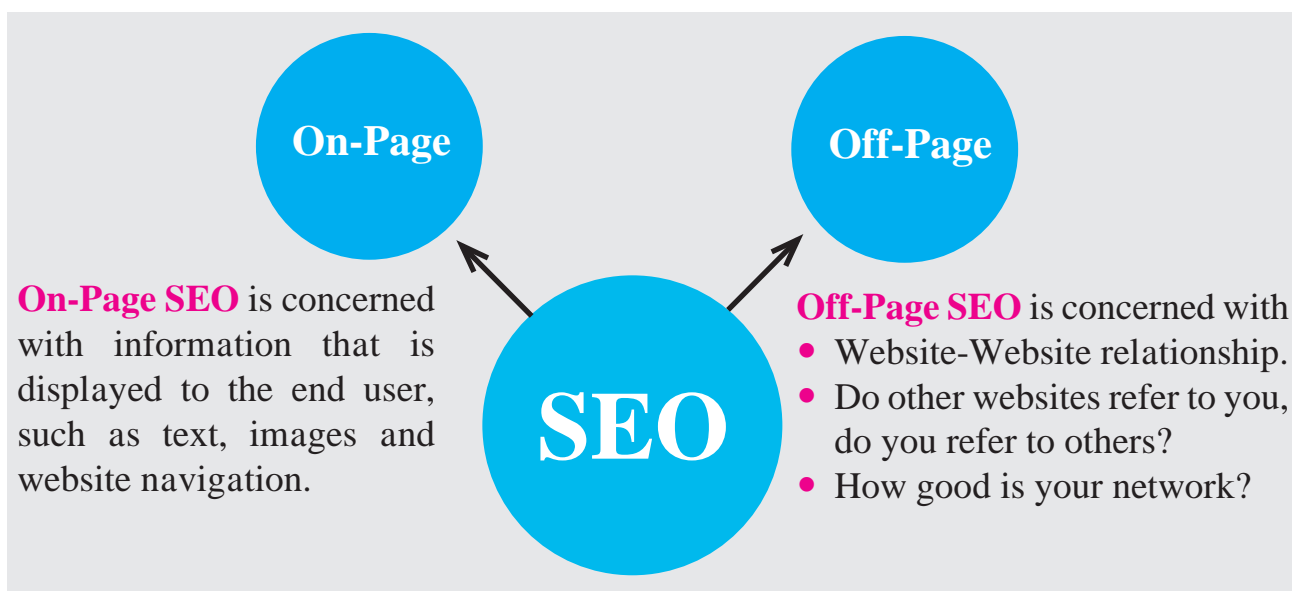

Fig 2.1: Types of SEO

2.3 Techniques of SEO

These are classified into two broad categories:

- **White Hat SEO** : Techniques that search engines recommends as apart of good design.
- **Black Hat SEO** : Techniques that search engines do not approve. The techniques used for optimizing the website are manipulative.

Refer the following strategies and differences in short about Black Hat and White Hat techniques–

<h1>WHITE HAT</h1>  <h2>WHITE HAT STRATEGIES</h2> <ul style="list-style-type: none">• Relevant content• Well-labeled images• Relevant links and refernces• Complete sentences with good spelling and grammar• Standard-compliant HTML• Unique and relevant page titles	<h1>BLACK HAT</h1>  <h2>BLACK HAT STRATEGIES</h2> <ul style="list-style-type: none">• Duplicate content• Invisible text and stuffed keyword• Cloking or re-directing the user to another site or page• Links from sites with non-relveant content
--	---

2.4 Optimizing Website

There are various sections of a website which can be optimised for better SEO. Some of the ways to optimize the webpage for SEO

1. SEO : Page structure optimization

- Html programs should start with `<!doctype html>`.
- If it is singular tag eg `` it should be self enclosed like this- ``
- Order of tags should be proper. Most of the time recently opened tag will be closed first.
- **It is recommended to use**
 - **<TITLE>** : Title is the first thing that user notices in search result list while using google for searching. Contents should be up to 60 characters (spaces included)
 - **Meta-description Tag** : While creating a web page, Meta description should be used to boost your On-Page SEO. Meta Description should be between 70 and 160 characters (spaces included)

- **Heading Tags :** The page should include proper heading tags from <h1> to <h6> wherever required.
- **Image Tags with ALT attribute :** The alt attribute gives information about the image, so even if the image does not download, it can make the viewers understand the image related information.

Examples of optimized Webpages

Example 1 :

```
<!doctype html>
<html>
<head><title> Page structure with
appropriate order of opening and
closing tags</title>
</head>
<body>
<h1> Let us understand SEO</h1>
<p>Webpage optimization helps for
higher ranking in search engines.
<b>There are number of ways to
opimize the pages.<i>Even the Social
media plays an important role!!!</i>
</b>
</p>
</body></html>
```

Note : In the above example check the ordering of <p>,and<i>. The innermost tag ends first, followed by the outermost tag. The other basic tags also follow a proper ordering as per the HTML structure.

Example 2 :

```
<!doctype html>
<html>
<head><title> Meta tag and Image tag
</title>
<meta name = "description" content =
"statue of liberty">
<meta name = "keywords" content =
"alt, optimization of image">
<meta name = "image" content =
"statue of liberty">
</head><body>
<h1> Let us understand Meta and
Image for optimization </h1>
<p>
<img src ="statue of liberty.
jpg"alt="Statue of liberty image"/>
</p>
</body></html>
```

Note : In the above example meta tag is used with important and valid keywords related to that image, like the image source as statue of liberty and from the view of optimisation of tag.

2. SEO Keywords

SEO keywords are the important words and phrases related to the developed website content. A list of keywords. Need to be carefully choosen to optimize the search. Keyword Research and Analysis is an important part of the Search Engine Optimization (SEO) as well as "Search Engine Marketing".

For "Search Engine Marketing", one can pay for certain keywords.

There are various online Keyword Planner tools (such as Google AdWords Keyword Planner) to shortlist keywords. This is more useful to compare the cost of various keywords, if the website designer opts for Paid Search Engine Marketing.

3. SEO Social Bookmarking

Social bookmarking is a powerful tool in promoting a website. It is very useful for Off-Page SEO optimization.

Did you know?

Modern browsers support bookmark features. For example, you can save the bookmark in the browser by clicking the star icon next to the URL in Google Chrome.

Bookmarks are website links that are stored for future references. They are very useful specially when Web pages with long URLs are not easy to remember. Bookmarking service allows you to save, organize and share bookmarks with other users. External links are the important SEO factors to rank a website higher in the search engine. With Social bookmarking, you can quickly create high-quality backlinks.

4. SEO-Social Media Optimization (SMO)

It deals with enhancing the website's ranking, using interactive communities like facebook, twitter, blogs, forums and so on. When these communities have

links to the created website it builds familiarity and trust about the website.

5. SEO-Backlinks

Backlinks are links on one website that, when clicked, take the user to another site. Backlinks are especially valuable for SEO because they contribute to the overall strength and value of the content. They also represent a "vote of confidence" from one site to another. In short, backlinks to your website are a signal to search engines that others are interested to know about the contents form your website.

6. Other factors for SEO

- **Speed of the website :** While creating a website, attention is given on the design, content and as many visuals as possible. However, all But this can slow down the website and obstruct usability.
- **Mobile friendly :** Website's mobile friendliness has become a ranking factor for Google. Hence, it is very important to ensure that the created website is mobile friendly 'for maximum' exposure and to improve the websites ranking.

Do you know?

In Google chrome you can check if your site is mobile friendly by right-clicking anywhere on the page and clicking "Inspect. "There is an icon at the left of "Elements "called" Toggle device toolbar "which changes the page to mobile mode when clicked.

- **Creating Robots.txt** : This file tells search engine which pages you want to exclude from indexing. For example, if you do not want a certain page or image being indexed, then you can restrict that page from being indexed.

2.5 SEO Audit

An SEO Audit helps to find out what could be done to improve ranking on search engines, so that consumers could find the website with greater ease. It analyses the websites health.

Eg-Seomator, SEOptimizer are few free SEO audit tools available on net.

SEOptimizer is a free SEO Audit Tool that will perform a detailed SEO Analysis. It provides clear and actionable recommendations that can be taken to improve your online presence.
